Corporations Do Not Believe Their Business Should Be Opened to Competitors.

[Special to The Times-Dispatch.]
Winston-Salem, N. C., January 30.—The business corporations of this city are planning, through the Board of Trade, for a vigorous protest to be considered to be an unfair and unjust provision in the national corporation law that the information furnished by the government by corporations and joint stock companies shall be regarded as public records and be open to inspection at any time. The provision referred to is contained in section 38, paragraph 6, which says: "When the assessments shall be made, as provided in this section, the returns, together with any corrections thereof which may have been made by the corporation, shall be filed in the office of the Commissioner of Internal Revenue and shall constitute public records and be open to inspection as such."

The corporations and companies of various kinds believe that it is unfair and unjust to make them unfold the inner workings of their business to their competitors or to any one else who might care to see. The law requires that the following information be furnished: A statement of the total amount of indebtedness, gross income, total amount of all ordinary and necessary expenses in running the business, total amount of losses, total amount of depreciation, total amount of interest on all indebtedness, total taxes of all kinds, amount received by way of stock in other companies and the net income.

CARLOAD OF MEAL ALLEGED TO BE "SHORT"

[Special to The Times-Dispatch.]
Winston-Salem, N. C., January 30.—United States District Attorney A. E. Holton has been in the city for several days, investigating the alleged shortage of a carload of corn meal found in the possession of the Adams Grain and Provision Company, of Charlotte, N. C., which was shipped to this city for violation of the pure food and drug act. The violation consists in alleged misbranding the sacks in that they were put up and branded as twelve, twenty-four and forty-eight pounds, whereas the weight actually fell short from three-tenths to one and a quarter pounds in each sack. There were 644 bushels in the shipment, and the weight should have been 32,832 pounds, whereas it was only 31,560, a shortage of 872 pounds, or about eighteen bushels. The milling company can have the meal restored by giving bond to comply with the law, making up the shortage in each sack and paying the cost of proceedings.

RYAN AND MORGAN BUYING COAL LANDS

They Are Believed to Be Taking Over Vast Fields in Southwest—May Change Railroad Map.

[Special to The Times-Dispatch.]
Roanoke, Va., January 30.—It was learned here to-day on good authority that the Thomas Fortune Ryan and of Pierpont Morgan interests are considering the purchase of lands in Southwest Virginia, a proposed deal which has been the cause of so much speculation recently. If this is true, and there is reason to believe that it is, it is very likely that the deal in which the Virginia Iron, Coal and Coke Company was reported sold some time ago, was put through. The Virginia Iron, Coal and Coke Company is, or was, principally owned by H. K. McHarg, of New York, New Haven and Hartford Railroad stocks and bonds. It is claimed that he owned 50 per cent of the stock of the Virginia Iron, Coal and Coke Company, which has a large acreage and a number of operations through the South, principally at Foms Creek, in Wise county. If this property has been sold the owners will become a large owner of coal lands, and may change the whole map of the Southwest as far as railroads are concerned by the entrance of the Virginia and Southwest line into the field. A Fine Time to Work Out the Food Problem

The widespread "shriek" about high prices for meat will induce people to plan meals with more reason and better judgment of food strength and cost.

Many of our strong men, College Athletes and others, learned from actual experience that a vegetarian diet produced better results than a diet including meat.

Many famous names appear in the vegetarian list. Names whose owners are champions and prize winners in their chosen field of athletics.

After all the argument for and against any particular kind of diet, the question can best be solved for the individual by personal experiment.
